New isolated polypeptide for use in a vaccine for stimulating an immune response, or for treating or diagnosis cancer, preferably prostate cancer. WPI; 2003-756193/71. P-PSDB; ADB13982.

Example 11; Page; 101pp; English.

The invention relates to an isolated polypeptide comprising no more than 11-542 amino acids of ADB1353 comprising a sequence ADB1487. The fargement ADB13563 comprising a sequence ADB1487. The peptides comprise a fragment ADB13563 of that contain naturally processed T-cell epitopes for 3 class I major histocompatibility complex (MFC) alleles. ADB13563 is a polypeptide encoded by a human prostate specific contains and peptides, expression vectors, a host cell transformed with the vector, an isolated antibody (or antigen binding fragment) that specifically binds to the protein or peptide, detecting the proteins and peptides, expression vectors, a host cell fragment) that pencifically binds to the protein or polypeptide or a polypeptide that binds to che agent and comparing the amount of polypeptide to a predetermine the presence of cancer, a fusion protein or off value to determine the presence of cancer, a fusion protein or opposition of polypeptide that binds to opecific for a tumour protein comprising contacting T cells of patient comprising the peptides or proteins, stimulation, tracting prostate cancer in a patient and treating prostate cancer in a patient comprising determining the presence of cancer in a patient and treating prostate cancer in a patient comprising cluster of differentiation (CD4+) and/or CD8+ T cells included or composition of the proteins so that the T cells proliferate, and administering the peptides or an ingen presence of cancer in a patient. The peptides or an oligonucleotide that hybridises to nucleic acid encoding them), is used to detect the presence of cancer in a patient. The peptides or an oligonucleotide or the hybridises to nucleic acid encoding them), is used to see the presence of cancer in a patient. The peptides of an oligonucleotide or expand T cells specific for a tumour protein, the peptides or the peptides or expand T c

Patent No. 6344550
GENERAL INFORMATION:
PAPPLICANT: Frudakis, Tony N.
APPLICANT: Smith, John M.
APPLICANT: Smith, John M.
APPLICANT: Reed, Steven G.
TITLE OF INVENTION: COMPOSITIONS AND METHODS FOR THE
TITLE OF INVENTION: TREATMENT AND DIAGNOSIS OF BREAST CANCER NUMBER OF SEQUENCES: 297
CORRESPONDENCE ADDRESS:
ADDRESSER: SEED and BERRY LLP
STREET: 6300 Columbia Center, 701 Fifth Avenue
  Length 1851;
                                                 1; Indels
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      933

| Patent No. 639578
| GENERAL INFORMATION:
| APPLICANT: Dillon, Davin C.
| APPLICANT: Harlocker, Susan Louise
| APPLICANT: Jang, Yuqui
| APPLICANT: W., Jiangchun
| APPLICANT: W., Jiangchun
| TITLE OF INVENTION: COMPOUNDS FOR IMMUNOTHERAPY AND DIAGNOSIS
| TITLE OF INVENTION: OF PROSTATE CANCER AND METHODS FOR THEIR USE
| FILE REFERENCE: 210121-427C8
| CURRENT APPLICATION NUMBER: US/09/352,616A
| CURRENT PRILING DATE: 1999-07-13
| NUMBER OF SEQ ID NOS: 472
| SOFTWARE: FastSEQ for Windows Version 3.0
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             ;

This is the 5' sequence of the clone insert
Clone from S. Wiemann, Molecular Genome Analysis, German Cancer
Research Center (DKFZ); Email s.wiemann@dKz-heidelberg.de;
Braunschweig/Germany) within the CDNA sequencing consortium of the
German Genome Project.
No sl sequence available.
This clone (DKFZ0781C0523) is available at the RZPD in Berlin.
Please contact the RZPD: Ressourcenzentrum, Heubnerweg 6, 14059
Berlin-Charlottenburg, GERMNY; Email: clone@rzpd.de.

                                                                                                                                                         This is the 5' sequence of the clone insert
This is the 5' sequence of the clone insert
Clone from S. Wiemann, Molecular Genome Analysis, German Cancer
Research Center (DKEZ), Email s.wiemann@dkfz-heidelberg.de,
sequenced by MediGenomix (Martinsried/Germany) within the cDNA
sequencing consortium of the German Genome Project. No s1 sequence
available.
This clone (DKEZp686E1728) is available at the RZPD in Berlin.
Please contact the RZPD: Ressourcenzentrum, Heubnerweg 6, 14059
